

Vercleven Samuel

Automation Engineer

Automation engineer with four years of apprenticeship at SLB, specializing in industrial automation, PLC programming, and system integration. Currently a 4th-year engineering student in Robotics and Industry 4.0 at ESILV. Strong experience in LabVIEW, Control Expert, HMI development, and industrial robotics.

WORK EXPERIENCE

Apprentice project lead, robotics automation Nov 2025 - Now

Technical and organizational lead for the integration and programming of an electric screwdriver on a UR5e collaborative robot.

- Lead of a four-student team: task allocation, progress monitoring, meeting preparation, and consolidation of reports
- Project planning and documentation management using Microsoft Excel (Gantt), Word (technical reports), and PowerPoint (presentations)
- UR5e automation development:
- URCap development in Java for custom program nodes
- URScript programming for motion control and process logic
- Configuration and management of digital I/O (24 V)
- Implementation of sequencing and operational cycles
- End-effector integration and control (electric screwdriver)
- Functional testing, debugging
- Use and management of virtual machines for development and testing environments

Automation engineer Nov 2021 - Now

Automation engineer with four years of apprenticeship at SLB, with specialization in industrial automation, PLC programming, and system integration.

- Reverse engineering and functional analysis of industrial shock machines
- Automation of thermal cycles for hot shock machines using LabVIEW
- Integration of DB9 connectors (RS232, RS485) into temperature chambers
- Design, wiring, and retrofit of electrical cabinets to ensure ISO and electrical compliance
- Upgrade of emergency stop circuits to meet current safety standards and prepare electrical audits
- Electrical schematic design using AutoCAD Electrical
- PLC programming and automation with Control Expert: LD (Ladder), SFC (GRAFCET), ST
- HMI design and deployment using Vijeo Designer
- Development in Python and LabVIEW for automation and test systems
- Continuous Improvement Champion (SLB, 2024) for full automation of the MTS test machine
- Application of continuous improvement methodologies (5S)

Student Nov 2015 - June 2021

- Bachelor of Technology (BUT) in Electrical Engineering and Industrial Computing (GEII)
- Baccalaureate STI2D — Engineering Sciences option

Contact

- Samuel.vercleven@gmail.com
- +33 6 60 37 56 32, PARIS
- <https://fr.linkedin.com/in/samuel-vercleven>

Skills

- Programming languages: Python, C++, C#
- PLC programming and industrial automation (Control Expert)
- HMI development and configuration (Vijeo Designer)
- PLC programming standards: Ladder (LD), SFC (GRAFCET), Structured Text (ST)
- Automation and supervision systems
- Electrical schematics and cabinet design (AutoCAD / AutoCAD Electrical)
- Temperature control and test automation (LabVIEW)
- Human–Machine Interface HMI design and integration
- Microsoft Suite: Excel (Gantt, project tracking), Word (reports), PowerPoint (presentations)
- Continuous improvement methodologies: 5S, White Belt, Yellow Belt

Other

- Volleyball player
- Video games player
- Motorcycle riding (650 cc)
- Strength training / weightlifting
- French: native
- English: B2+ (technical and professional)
